## COMPLEX FERTILIZERS NK GRADE 24-0-3

Complex fertilizers contain in their composition the main elements of nutrition for plants – nitrogen, phosphorus and potassium, and may also contain additives of macro- and microelements. They are intended for application to any types of soils for the purpose of mineral nutrition of agricultural crops in crop production.

| | |
|---|---|
| Appearance | compacted granules of irregular shape from grayish-white to red-brown or yellow |
| Total Nitrogen (N) | 24% |
| Total Potassium (K2O) | 3% |
| Total moisture, max. | 1,8% |
| Dynamic strength , min. | 80% |
| Granulometric composition (fraction mass ratio) | |
| -more than 5 mm, max. | 10% |
| -from 2 to 5 mm, min. | 80% |
| -less than 1 mm, max. | 5% |
| Friability | 100% |

The product corresponds in quality to TU BY 690668188.002-2019, N:K 24-0-3.
Joint storage with acids, alkalis, oxidants, organic and combustible materials is not allowed. Keep away from heat. The field of application is crop production.
Failure to comply with storage and transportation conditions may lead to environmental pollution.
Storage is allowed in open areas with a hard surface under a canopy.
